Packed Towers In Processing And Environmental Technology

packed towers in processing and environmental technology

packed towers in processing pdf

In chemical processing, a packed bed is a hollow tube, pipe, or other vessel that is filled with a packing material. The packing can be randomly filled with small objects like Raschig rings or else it can be a specifically designed structured packing.

Packed bed - Wikipedia

Packed towers are used as contacting equipment for gas-liquid and liquid-liquid systems. The basic unit consists of: (1) shell, (2) packing (one or more sections), (3) packing support(s), (4) liquid distributor(s), (5) intermediate supports and redistributors, and (6) gas and liquid entrance and exit nozzles.
