stability of numerical methods for computing / padé approximants ...

(PDF) Stability of numerical methods for computing Padé ...

In mathematics, extrapolation is the process of estimating, beyond the original observation range, the value of a variable on the basis of its relationship with another variable.

In mathematics, a continued fraction is an expression obtained through an iterative process of representing a number as the sum of its integer part and the reciprocal of another number, then writing this other number as the sum of its integer part and another reciprocal, and so on. In a finite continued fraction (or terminated continued ...

Continued fraction - Wikipedia

This module teaches advanced mathematical methods with the aid of Maple, an algebraic computing language with graphics and numerical capabilities, which youâ€™ll be taught how to use.

Apéry's constant is defined by $\zeta(3) = 1.2020569\dots$, (1) (OEIS A002117) where $\zeta(z)$ is the Riemann zeta function. Apéry (1979) proved that $\zeta(3)$ is irrational, although it is not known if it is transcendental. Sorokin (1994) and Nesterenko (1996) subsequently constructed independent proofs for the irrationality of $\zeta(3)$ (Hata 2000 ...

Apéry's Constant -- from Wolfram MathWorld

For an ellipse of cartesian equation $x^2/a^2 + y^2/b^2 = 1$ with $a > b$: a is called the major radius or semimajor axis. b is the minor radius or semiminor axis.

Circumference/Perimeter of an Ellipse: Formula(s ...

A selection of mathematical and scientific questions, with definitive answers presented by Dr. Gérard P. Michon (mathematics, physics, etc.).
