Pathognomonic Signs of Communicable Pathognomonic Diseases Posted in November 1st, 2008 by Jeanette by Jeanette in Health & Nutrition Pathognomonic is a sign or symptom that is so characteristic of a disease that it makes the diagnosis. Pathognomonic (pronounced patho-no-monic) pat ho-no-monic) comes from the Greek $\acute{\alpha}\nu\theta\omicron\gamma\gamma\eta\mu\omicron\nu\kappa\omicron\varsigma$ meaning $\acute{\alpha}\nu\theta\omicron\gamma\gamma\eta\mu\omicron\nu\kappa\omicron\varsigma$ meaning "skilled in judging diseases." As it is very important to know how to assess characteristic manifestations of some communicable diseases at an early ...

This subreddit was started in hopes of having a central and easily accessible user-created resource for all diseases that have pathognomonic findings as well as findings that are sine qua non for diseases. These types of findings can be very important for swift and efficient diagnoses with minimal cost to the patient and insurance (and make the whole idea of spot diagnoses possible). In a ...

JOURNAL INFECTIOUS MONONUCLEOSIS - bmj.com

Our patient had signs of a wasting syndrome similar to that seen in patients with AIDS, but he did not meet the immunologic criteria for AIDS. Therefore, we conclude that the "straight hair sign" is not pathognomonic for HIV infection and may be seen in patients with chronic nutritional deficiency.

Straightening of the Hair Is Not Pathognomonic for HIV ...

The virus is highly infectious. Clinical signs will develop in contact chicks within 36 h and in nearby sheds within one to two days. Infection is resolved within fourteen days with a rise in antibody titres. In a small number of chicks, latent infection is established with subsequent erratic shedding of virus

Avian infectious bronchitis virus - Home: OIE

Clinical signs: The severity of infectious bronchitis infection is influenced by the age and immune status of the flock, by environmental conditions, and by the presence of other diseases. Feed and water consumption declines. Affected chickens will be chirping, with a watery discharge from the eyes and nostrils, and labored breathing with some gasping in young chickens. Breathing noises are ...

Few signs or lesions associated with oral infection are pathognomonic and an aetiological diagnosis based solely on clinical observation is often not possible. An accurate diagnosis is essential so that any potentially devastating disease is recognised at an early stage. In the UK, the most crucial diagnostic differentiation is foot-and-mouth disease, the clinical signs and lesions of which may initially be confused with a number of other viral diseases, including vesicular stomatitis ...
