Abstract: We propose an alternative generator architecture for generative adversarial networks, borrowing from style transfer literature. The new architecture leads to an automatically learned, unsupervised separation of high-level attributes (e.g., pose and identity when trained on human faces) and stochastic variation in the generated images ...

RESEARCH REPORT 89 - Health and Safety Executive

Design research was originally constituted as primarily research into the process of design, developing from work in design methods, but the concept has been expanded to include research embedded within the process of design, including work concerned with the context of designing and research-based design practice.

With design research, designs are more meaningful and effective because they are grounded in a real-world context. The goal of this course is to introduce the process of design research and to help designers understand how critical it is to being able to develop great designs.
