

# Rheological Properties Of Cosmetics And Toiletries Cosmetic Science

## **rheological properties of cosmetics pdf**

Rheology (/ ˈr iː ˈɛ ˈ ɛ ˈ l ɪ ˈ ɛ ɪ ˈ d ɪ ˈ i /; from Greek ῥῆμα, "flow" and -λογία, -logia, "study of") is the study of the flow of matter, primarily in a liquid state, but also as "soft solids" or solids under conditions in which they respond with plastic flow rather than deforming elastically in response to an applied force.

The growing industrial interest in nanoemulsions is demonstrated by an analysis of the increase in patent-protection activities. From 1994, about 900 patent families (pf) can be identified as "nanoemulsions" for cosmetic applications, which represent more than 1900 granted patent applications during the past 20 years.
