Box and Cox (1964) developed the transformation. Estimation of any Box-Cox parameters is by maximum likelihood. Box and Cox (1964) offered an example in which the data had the form of survival times but the underlying biological structure was of hazard rates, and the transformation identified this.

(PDF) Macroeconomics%2c 7th Edition by Olivier Blanchard ...

Welcome to the Fiat standard of sticky posts. This is the only reoccurring sticky. The third indispensable element in building the new prosperity is closely related to creating new posts and discussions.

The [Fiat Discussion] Sticky. Come shoot the shit and ...

This chapter focuses on the estimation and interpretation of gravity equations for bilateral trade. This necessarily involves a careful consideration of the theoretical underpinnings since it has become clear that naive approaches to estimation lead to biased and frequently misinterpreted results.

Gravity Equations: Workhorse, Toolkit, and Cookbook ...

The decision to share resources is fundamental for cohesive societies. Humans can be motivated to give for many reasons. Some generosity incurs a definite cost, with no extrinsic reward to the act, but instead provides intrinsic satisfaction (labelled here as ã•altruisticã•™ giving).

A comparative fMRI meta-analysis of altruistic and ...
